Mail Tracking

Be prepared for new calls and online leads by knowing exactly when your mailing campaign is hitting mailboxes.

Mail Tracking Features:

- Track mail right down the individual addressee/individual
- Fully integrated with informed visibility and displayed graphically with Google Maps
- Exportable reporting by city, state and zip code
- Want to know if a certain individual received their direct mail piece? Search by name!
- Retrieve a full report of non-scans

The key benefit is you will now be able to use one service for both tracking and marketing and that will save you $$.
